

SUMMARY

Solution focused developer eager to tackle challenging issues and provide innovative solutions. Persistence, personal integrity and a positive attitude are major strengths consistently cited by managers and team members. I'm a resourceful life-long learner, who enjoys collaborating across multidisciplinary teams, but also can work independently as needed. I'd love the opportunity to grow as a user centred front-end developer, and improve the human condition one digital project at a time.

EXPERIENCE

2017 - Present

Full Stack Developer
FREELANCE

RESPONSIBILITIES:

During the coding bootcamp I worked on various projects individually and as part of a 3-4 person development team. I designed, prototype and developed several websites and web applications using different front-end and back-end languages and API's.

Built multiple web applications concurrently within 2-3 week timelines.

Implemented various front-end libraries and frameworks, like Bootstrap and Materialize.

Designed and created interactive and mobile responsive web applications & websites ensuring usability and UX best practices.

Test against requirements and debug applications.

Modified databases using MongoDB and MySQL.

2015 - Present

IT Analyst
DUKE UNIVERSITY

RESPONSIBILITIES:

Assigned eight departments to support faculty, staff and students at Trinity college, with software and hardware related issues in a MAC dominate environment. Ensured a very high level of customer service and educational training regarding processes and procedures for academic resources.

Image computers MAC/PC using Casper and CM12.

Deploy pre-imaged iPads with apple configurator 2.

Install and configure FileMaker Pro for users with authenticated access to the service.

Maintain departmental budgets for hardware and software purchases and upgrades.

Upgrade systems hardware and software

2013 - 2015

IT Analyst
MEDFUSION

RESPONSIBILITIES:

Support local and international remote employees with software & hardware related issues. Expertise in Windows/Mac environments, networking and TCP/IP. Outstanding customer service skills resolving technical issues and educating end-users.

Maintained Active Directory Domain Exchange server.

Documented procedures for software installs.

Install and upgrade hardware and peripherals.

Maintain company asset assignments, update maintenance logs and provide technical recommendations regarding purchasing.

2010 - 2013

Specialist
US ARMY, 82ND DIV

RESPONSIBILITIES:

Served as rifleman, translator and radio tactical operator during Operation Enduring Freedom.

2003 - 2010

Translator
US SPECIAL OPS CMD

RESPONSIBILITIES:

Translated classified documents and performed verbal translation during meetings, conferences and interrogations. Developed and trained junior translators.
